

Senior SAP Procurement & Logistics execution

To expand our Supply Chain Management Team, we are looking for:

Senior functional consultant in SAP Procurement & Logistics execution

You will be responsible for delivering a profound knowledge of the procurement function with a support in assessing, organizing, improving, implementing & managing the procurement process.

Your work will be project-base, imposing requirements on your knowledge & ability to see both the details & the big picture.

Key responsibilities

- Address both strategic & operational Procurement & Logistics issues
- Guiding team through problem definition, issue identification & work plan development using problem solving principles
- Advise customers on how they can improve the efficiency of inbound & outbound logistics in SAP ERP
- Advice customers on how to manage supplier & procurement activities for reduced spend & increased performance.
- Build long-term relationships with key clients

Qualifications

- You have a master's degree
- You have at least 5 years of relevant SAP Procurement & Logistics experience ideally within a validated environment.
- You have worked as a senior consultant in one or several of the following SAP modules; **MM, SD, QM**.
- You have the ability to understand critical success factors for our clients & their industry
- Ability to travel when required
- Some ABAP skills would be advantageous in order to do some debugging & being able to communicate well with programmers.

Professional Skill Requirements

- Proven ability to work creatively & analytically in a problem-solving environment
- An understanding of technology & its application to business
- Excellent leadership, communication (written & oral) & interpersonal skills
- You will be expected to be passionate & positive about the opportunity to enhance your existing skill set & experience

Are you destined for greater things & think that InXites should know about you, submit your profile to info@inxites.be or give us a call on 00 32 2 254 02 51.
